

12/6/10

Dear Dr. Sagen,

It has been over two months since you gave me the second nerve block injection and the acute pain in my heel is still gone. I cannot thank you and your staff enough; your compassion and persistence to relieve the pain in my heel has given me back my life. I want to express my thanks to you for caring, it means so much! After seeing six other doctors I had almost lost all hope and was becoming depressed (much unlike my nature). I am now able to get through my days without severe pain in each and every step that I take. Thank you, Thank you Thank you! You made the difference.

Sincerely,
Mark Aziz

Happy Holidays!
